

Project title

**Question**

**Object**

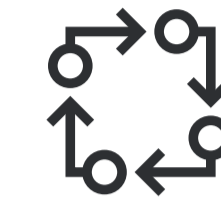

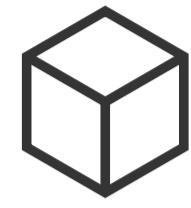

**Resources**

**Phases**

**Results**

Define the prototyping question:  
(to understand what you want to learn the prototyping lessons from)

Define the object of prototyping:  
- experiences, processes, services  
- physical objects  
- environments, spaces  
- software, digital artifacts  
- value, ecosystems

Indicate the economic resources available for prototyping:

Indicate the materials available for prototyping:

Indicate the locations and contexts available for prototyping:

Indicate the human resources available for prototyping (active role and passive role):

Indicate the project data available for prototyping:

Define the actions for the construction of the prototype:

Phase 1

Phase 2

Phase 3

Phase n

Indicate the results you intend to obtain from the analysis and collection of data and feedback.
